PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student and MARA scholar building web apps, iOS apps and business automation. Delivered booking and operations tools with the Klynn team and shipped Daysmark on the App Store. Seeking a software development role combining engineering, product thinking and collaboration.

EXPERIENCE

Klynn | Product & Engineering Lead | 2025 - 2026

- Built a TypeScript, Next.js and React web app for laundry booking, plus internal tools for order tracking, rider assignment and payouts; deployed on Vercel.
- Used customer feedback to choose a web app over a separate native build, avoiding native-app development and Apple Developer membership costs for the company.
- Connected Make and Telegram fulfilment workflows; added input validation and login rate limiting, moved secrets to environment variables and addressed Next.js security advisories.
- Worked remotely with the team from South Korea. Klynn delivered 251 orders in its first financial year ending June 2026, as reported in the CFO's recommendation.

Qawi Studio | Freelance Web Developer | 2026

- Delivered scoped websites, online stores and automation for small businesses, from requirements and interface design to deployment and handover.
- Built Orka Film (byorkafilm.com) and DZR Water Ambulance (dzrwaterambulance.my), including a custom CMS for client-managed content on the latter.

AUQ Clothing | Freelance Web & Automation Developer | 2024 - 2025

- Integrated Claude API, Make, Google Drive and a Telegram bot to generate invoices and connect everyday workflows for a B2B apparel business.

SELECTED PROJECTS

Daysmark Countdown | Swift | Published on the App Store | 2026

- Designed, built and released a native iOS countdown app with Home Screen and Lock Screen widgets, local storage and no backend database; delivered four releases through version 1.3.

Finnit | Swift, iOS Shortcuts, RevenueCat | TestFlight beta | 2026

- Built a personal finance app with on-device tracking, receipt scanning, budgets and goals. Configured bank-alert expense capture through iOS Shortcuts; submitted for App Store review. finnit.my

QSend | React Native, Expo | Pending App Store approval | 2026

- Built an iPhone workflow for quotations, invoices and receipts, with PDF sharing and DuitNow payment details. qsend.vercel.app

TECHNICAL SKILLS

Languages & frameworks: TypeScript, JavaScript, React, Next.js, Swift, React Native, Expo, HTML, CSS, Tailwind CSS; Python (coursework).

Data & delivery: Supabase / PostgreSQL, REST APIs, Git, Vercel. **Automation:** Make, n8n, Telegram bots, Claude API. **AI development tools:** Claude Code, OpenAI Codex, Cursor.

EDUCATION

Sungkyunkwan University, South Korea | Bachelor's degree, Computer Science and Engineering
2023 - February 2027 (expected) | MARA scholarship

Universiti Kuala Lumpur | Foundation in Science and Technology | 2021 - 2022 | CGPA 3.94

Royal Military College | 2019 - 2021 | SPM: 9 A's | Senior Under Officer / Head Cadet
